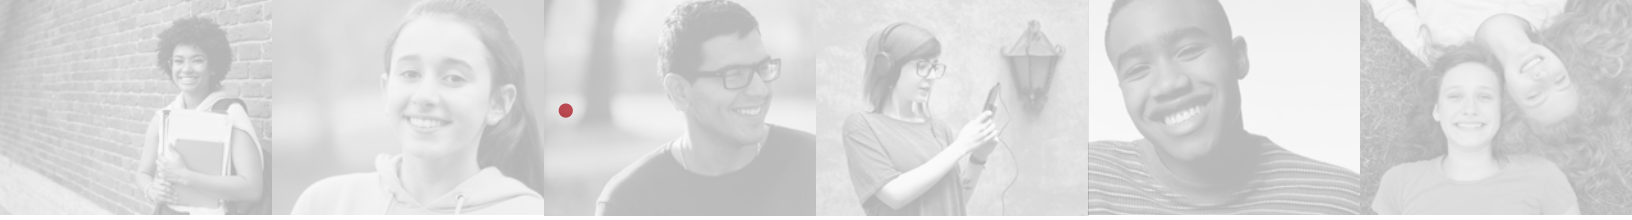
PRESENTS

YOUNG VOICES IN DECEMBER

A campaign to bring awareness and support to mental health issues and substance use disorders among youth during COVID-19

Mentor
Foundation USA



To help slow the spread of coronavirus, nearly every state in the U.S. closed schools for the remainder of 2019-2020 school year, which affected 30 million students

The Campaign

TO BRING AWARENESS AND SUPPORT TO MENTAL HEALTH ISSUES AND SUBSTANCE USE DISORDERS AMONG YOUTH DURING COVID-19

COVID-19 and opioid addiction are considered the two great epidemics of our generation, and they are intersecting in increasingly deadly ways. The isolation of communities directly impacts our society, and even more so, on our youth. The need for adolescent mental health support and substance use prevention has never been greater, and we remain dedicated to continuing our vital work to empower young people to live healthy and productive lives, free of substance use.

Our Story

FOR A WORLD WHERE CHILDREN AND YOUNG PEOPLE ARE EMPOWERED TO MAKE HEALTHY DECISIONS AND LIVE DRUG-FREE.

Mentor Foundation USA works with innovative, evidence-based intervention approaches to prevent youth substance use and promote health and well-being. Our vision is a world where children and young people are empowered to make healthy decisions and live drug-free.

Mentor International, together with Mentor Foundation USA and the other Mentor organizations around the world, is the leading international not-for-profit network empowering youth and preventing substance abuse. Mentor was founded by H.M. Queen Silvia of Sweden in collaboration with members of the World Health Organization (WHO).
